Look Who's On Board Now.

With new orders from American, Air Europe, Aero Lloyd, China Eastern, ILFC and ZAS Egypt, plus repeat orders from Finnair, the total orders and other commitments for our new MD-11 now number over 250. What's behind our wide-body's widespread appeal?

Airlines are choosing the MD-11 because it's the most efficient wide-body in the world. Because its advanced aerodynamic design and fuel-efficient engines provide profitability on long nonstop routes. And because, after passenger luggage is loaded, space remaining below deck for revenue cargo is unmatched.

The MD-11 is also being chosen for its passenger appeal—it has wide aisles, a spacious cabin, and more overhead storage space for carry-on luggage. And since the MD-11 offers a choice of engines from GE, Pratt & Whitney, or Rolls-Royce, it gives airlines commonality with existing equipment.

So if you're looking for a flexible wide-body that can handle point-to-point routes which avoid crowded hubs, why wait? Join the over 25 customers worldwide that have chosen the World Plane.
